OH&S MANAGEMENT

"Oliver Kelly Construction is committed to promoting a safe and healthy environment for our employees, our clients and the community."

Oliver Kelly Construction is quickly becoming renowned for providing complete confidence in relation to quality outcomes, risk mitigation and a safe environment, through a Safety Management process which has been approved by Workplace Standards Tasmania.

Safety Management Plans are compiled at planning stages to ensure strict hazard identification and risk assessments are undertaken against the individual scope and specification of every project. Safety Management Plans are reviewed on an ongoing basis to cater for contract variations or 'force majeure' events; and plan incorporate supplier & subcontractor activity, building material section, procurement and delivery.

Safety Management Plans are in accordance with the Workplace Health and Safety Act 1995, the Workplace Health and Safety Regulations 1998, the Workers Rehabilitation and Compensation Act 1998.

A key focus of the Oliver Kelly team is to identify areas in both building design and practice; where environment initiatives or innovations can be implemented and maximised.
